Brand: [Speedypress Ironing Equipment](#) **SKU:** MAG1900

Expertly built using high quality components
with a typical working life of 20+ years

The Magpie Ironing System

 **Manufactured
in the UK**

Description

The Magpie Ironing System makes ironing easy. You may own an Ironing Company, have a large household, run a bed and breakfast or hotel - whatever your circumstances are, we know your time is limited but quality is key. The Magpie Ironing System offers you a long lasting and professional finish. The ultimate ironing system for any environment. Designed to be worked hard, this system is robust enough to cope with heavy daily usage.

We manufacture this system ourselves, using the highest quality components, in our Gateshead factory. Our production team are highly skilled, very experienced, and meticulous in the construction of this fantastic ironing system. Built to last, the Magpie system will give you many years of usage whilst delivering the highest standard of ironing. Quality you can expect when buying British.

Regular maintenance and flushing of the boiler are recommended – especially if you will be using it in a hard water area. The blowdown valve enables you to flush the boiler with ease, so helping to prevent limescale build-up. Using distilled or filtered water will help keep the boiler and iron in tip-top condition and extend the working life.
