

TS06 Heated Vacuum Ironing Table

Rectangular worktop + 3.5L copper boiler + professional iron

A high-capacity rectangular pressing station designed for larger items such as bedding, curtains, tablecloths and bulky fabrics. Heated surface with accurate thermostat control, plus powerful multi-fan vacuum suction to lock fabric in place and pull moisture away for a crisp, dry finish.

Large worktop

150 × 81 cm

Heated surface

Thermostat 30–90°C

3× vacuum fans

3 × 150W

3.5L copper boiler

1300W · 3 bar · 850W iron

Operational benefits

- **Improved finish on large items:** Oversized rectangular board supports bedding, curtains and linens without constant repositioning.
- **Vacuum extraction = faster results:** Holds fabric stable, eliminates steam condensation and helps garments finish drier and sharper.
- **Comfort & throughput:** Thermostatically heated surface accelerates evaporation and keeps workflow moving.
- **Professional steam performance:** Copper boiler provides efficient heat transfer, corrosion resistance and stable output.

Table & control

- Automatic thermostatically controlled heated board surface
- Temperature adjustable from **30°C to 90°C**
- **Board size:** 150 × 81 cm
- **Working height:** 90 cm (fixed)
- Extensible support base for stability
- Lower shelf for placing ironed garments

Vacuum system

- **3 powerful vacuum fans:** 3 × 150W
- Locks fabric in position for cleaner creases and alignment
- Helps remove steam/condensation from textiles while ironing
- Designed for speed and efficiency in daily commercial use

3.5L copper boiler (built-in)

- **Capacity:** 3.5 litres (copper)
- **Anti-scale heating element**
- **Boiler power:** 1300W
- **Working pressure:** 3 bar
- Copper construction supports efficient thermal conduction and durability

Professional steam iron (included)

- **Iron power:** 850W
- Usable in **vertical or horizontal** position
- Dry steam output
- Heat shield + removable iron rest
- Ready-steam + water level warning lights
- Adjustable steam output volume

Technical specification

Model / SKU	TS06
System type	Heated rectangular table + vacuum suction + built-in steam boiler + iron
Heating elements (table)	2 × 700W
Vacuum fans	3 × 150W
Temperature control	Automatic thermostat • 30°C to 90°C
Board dimensions	150 × 81 cm
Working height	90 cm (fixed)
Boiler capacity	3.5 litres (copper)
Boiler power	1300W
Steam working pressure	3 bar
Iron power	850W
Energy class	A++
Weight	50 kg
Warranty	3 years
Country of origin	Italy
