

## TP06 Industrial Ironing Table

### Professional Product Information

The TP06 Industrial Heated Suction & Blowing Ironing Table is a heavy-duty professional finishing station designed specifically for demanding commercial ironing and garment finishing environments.

Manufactured for industrial and continuous-use applications, the TP06 is ideal for hotels, commercial laundries, dry cleaners, care homes, tailoring departments, garment manufacturers, theatre costume departments and professional ironing businesses.

Unlike standard ironing systems, the TP06 combines industrial suction, heated worktop and blowing functionality to deliver significantly improved finishing quality, reduced drying times and enhanced garment presentation.

### Key Features

- Industrial heated suction and blowing ironing table
- Designed for continuous commercial operation
- Professional 900W commercial steam iron included
- Large 120 x 40 cm ironing surface
- Two high-performance suction and blower motors
- Double pedal operation for ironing on both sides
- Industrial-strength construction for long-term reliability
- Ideal for commercial laundries, hotels, care homes and garment finishing
- Professional garment finishing quality
- Excellent for delicate fabrics, uniforms, linen and bedding

### Heated, Suction & Blowing Technology

The TP06 combines heated worktop technology with industrial suction and blowing systems to dramatically improve garment finishing quality.

- Heated surface prevents condensation build-up and improves drying speed
- Vacuum suction secures garments firmly for crisp professional finishing
- Blowing system creates an air cushion to prevent seam marks and shine
- Excellent for delicate fabrics and shaped garments
- Improves productivity and finishing consistency
- Reduces operator fatigue during long ironing sessions

## Steam Boiler Requirements

### IMPORTANT STEAM BOILER REQUIREMENTS

The TP06 ironing table is designed to operate from an EXTERNAL STEAM SOURCE and is not a standalone plug-and-play ironing system.

#### **The machine requires connection to either:**

- A professional commercial steam generator boiler
- A central steam supply
- A plumbed commercial steam system

#### **Recommended steam source specifications:**

- Operating pressure: 5 BAR
- Average steam consumption: 5–6 Kg/h
- Recommended boiler size: 5 litre minimum for light commercial use
- Recommended for continuous operation: 10 litre automatic or plumbed steam generator

#### **Suitable environments:**

- Commercial laundries
- Hotels
- Care homes
- Garment production facilities
- Dry cleaning operations
- Tailoring departments

#### **Using the correct steam boiler is critical to achieve:**

- Continuous steam production
- Consistent garment finishing
- Fast drying performance
- Maximum ironing efficiency
- Reliable all-day operation

For high-volume environments, TIECO UK strongly recommends pairing the TP06 with a commercial automatic refill steam generator or industrial steam boiler system.

## Technical Specifications

| Specification            | Details          |
|--------------------------|------------------|
| Voltage                  | 230V - 50Hz      |
| Worktop Height           | 92 cm            |
| Worktop Power            | 1100W            |
| Suction Motor Power      | 0.5 HP           |
| Blower Motor Power       | 0.5 HP           |
| Professional Iron        | 900W             |
| Steam Consumption        | 5-6 Kg/h         |
| Steam Operating Pressure | 5 BAR            |
| Ironing Surface          | 120 x 40 cm      |
| Machine Dimensions       | 59 x 160 x 94 cm |
| Weight                   | 94 kg            |

## Optional Accessories Available

- Suction sleeve ironing arm
- Blowing kit on sleeve arm
- Coin validator kit
- Air and steam gun kit
- Steam gun kit
- Steam brush kit
- Wire support with rocker arm
- Wire support with rocker arm and light
- Condensate drain
- Swivel iron rest
- Second iron kit
- Professional iron for left-handers
- Alternative professional iron weights
- Maxi ironing board upgrade 50 x 130 cm

## Recommended Applications

The TP06 is particularly suitable for:

- Hotels & hospitality groups
- Care homes & healthcare laundries
- Dry cleaning operations
- Tailoring & alterations departments
- Theatre & costume departments
- Professional ironing services
- Commercial laundries
- Garment finishing operations
- Uniform processing facilities

## Why Choose the TP06?

The TP06 offers a genuine industrial finishing solution for businesses that require professional garment presentation, reliable all-day operation and faster workflow efficiency. Its combination of industrial suction, blowing and heated worktop technology delivers significantly better results than standard domestic or semi-commercial ironing systems.
